

COMMISSION IMPLEMENTING DECISION

of 9 February 2017

on protective measures in relation to outbreaks of highly pathogenic avian influenza in certain Member States

(notified under document C(2017) 1044)

(Text with EEA relevance)

(EU) 2017/247

(OJ No. L 36, 11.02.2017, p. 62)

amended by (EU) 2017/417 (OJ No. L 63, 09.03.2017, p. 177)
amended by (EU) 2017/554 (OJ No. L 79, 24.03.2017, p. 15)
amended by (EU) 2017/696 (OJ No. L 101, 13.04.2017, p. 80)
amended by (EU) 2017/780 (OJ No. L 116, 05.05.2016, p. 30)
amended by (EU) 2017/819 (OJ No. L 122, 13.05.2017, p. 17)
amended by (EU) 2017/977 (OJ No. L 146, 09.06.2017, p. 155)
amended by (EU) 2017/1139 (OJ No. L 164, 27.06.2017, p. 59)
amended by (EU) 2017/1240 (OJ L 177, 08.07.2017, p. 45)
amended by (EU) 2017/1397 (OJ No. L 197, 28.07.2017, p. 13)
amended by (EU) 2017/1415 (OJ L 203, 04.08.2017, p. 9)
amended by (EU) 2017/1484 (OJ No. L 214, 18.04.2017, p. 28)
amended by (EU) 2017/1519 (OJ No. L 228, 02.09.2017, p. 1)
amended by (EU) 2017/1593 (OJ No. L 243, 21.09.2017, p. 14)
amended by (EU) 2017/1841 (OJ No. L 261, 11.10.2017, p. 26)
amended by (EU) 2017/1845 (OJ No. L 262, 12.10.2017, p. 7)
amended by (EU) 2017/1930 (OJ No. L 272, 21.10.2017, p. 18)
amended by (EU) 2017/1969 (OJ No. L 279, 28.10.2017, p. 56)
amended by (EU) 2017/2000 (OJ No. L 289, 08.11.2017, p. 9)
amended by (EU) 2017/2175 (OJ No. L 306, 22.11.2017, p. 31)
amended by (EU) 2017/2289 (OJ No. L 328, 12.12.2017, p. 126)
amended by (EU) 2017/2412 (OJ No. L 342, 21.12.2017, p. 29)
amended by (EU) 2018/314 (OJ No. L 60, 02.03.2018, p. 44)
amended by (EU) 2018/342 (OJ No. L 65, 08.03.2018, p. 43)
amended by (EU) 2018/418 (OJ No. L 75, 19.03.2018, p. 27)
amended by (EU) 2018/510 (OJ No. L 83, 27.03.2018, p. 16)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Directive 89/662/EEC of 11 December 1989 concerning veterinary checks in intra-Community trade with a view to the completion of the internal market ⁽¹⁾, and in particular Article 9(4) thereof,

Having regard to Council Directive 90/425/EEC of 26 June 1990 concerning veterinary and zootechnical checks applicable in intra-Community trade in certain live animals and products with a view to the completion of the internal market ⁽²⁾, and in particular Article 10(4) thereof,

Whereas:

(EU) 2017/247

- (1) Avian influenza is an infectious viral disease in birds. Infections with avian influenza viruses in domestic poultry and other captive birds cause two main forms of that disease that are distinguished by their virulence. The low pathogenic form generally only causes mild symptoms, while the highly pathogenic form results in very high mortality rates in most species of birds. That disease may have a severe impact on the profitability of poultry farming.
- (2) In the event of an outbreak of avian influenza in a Member State, there is a risk that the disease agent may spread to other holdings where poultry or other captive birds are kept. As a result, it may spread from one Member State to other Member States or to third countries through trade in live poultry or other captive birds or their products.
- (3) Council Directive 2005/94/EC ⁽³⁾ sets out certain preventive measures relating to the surveillance and the early detection of avian influenza and the minimum control measures to be applied in the event of an outbreak of that disease in poultry or other captive birds. That Directive provides for the establishment of protection and surveillance zones in the event of an outbreak of highly pathogenic avian influenza. This regionalisation is applied in particular to preserve the health status of birds in the remainder of the territory of the Member State by preventing the introduction of the pathogenic agent and ensuring the early detection of the disease.
- (4) Since early November 2016, 16 Member States (the ‘concerned Member States’), namely Bulgaria, the Czech Republic, Denmark, Germany, Greece, France, Croatia, Italy, Hungary, the Netherlands, Austria, Poland, Romania, Slovakia, Sweden and the

- United Kingdom, have notified the Commission of outbreaks of highly pathogenic avian influenza of subtype H5N8 in holdings on their territory where poultry or other captive birds are kept.
- (5) The highly pathogenic avian influenza virus of subtype H5N8 has since the end of October 2016 been detected in large numbers of wild birds, mainly of migratory bird species in the Member States listed above and in addition in Ireland, Spain, Portugal and Slovenia.
 - (6) In most Member States, the causative virus was first found in wild birds, before it was detected in holdings that keep poultry or other captive birds.
 - (7) Also neighbouring third countries such as the former Yugoslav Republic of Macedonia, Serbia, Switzerland, the Russian Federation and Ukraine have identified the highly pathogenic avian influenza virus of subtype H5N8 on their territories in wild birds or in holdings where poultry or other captive birds are kept.
 - (8) In response to the outbreaks of highly pathogenic avian influenza of subtype H5N8 in Denmark, Germany, France, Hungary, the Netherlands, Austria and Sweden the Commission adopted several Commission Implementing Decisions on protection measures addressed to these Member States.
 - (9) For reasons of clarity and in order to keep the Member States, third countries and stakeholders up-to-date on the evolution of the epidemiological situation, Commission Implementing Decision (EU) 2016/2122 ⁽⁴⁾ was adopted to list in one Union act the protection and surveillance zones established by the competent authority of the concerned Member States following outbreaks of highly pathogenic avian influenza of subtype H5N8 in holdings on their territory in accordance with Directive 2005/94/EC. The concerned Member States are listed in the Annex to that Implementing Decision.
 - (10) Since the adoption of Implementing Decision (EU) 2016/2122 the epidemic has further evolved and extended its geographical range in particular due to the ongoing seasonal movements of wild migratory birds and the occasional spillover to holdings where poultry and other captive birds are kept. Subsequent virus spread between holdings has also occurred in certain areas with a high density of holdings where poultry cannot be sufficiently protected against contacts with wild birds.
 - (11) Implementing Decision (EU) 2016/2122 was subsequently amended by Commission Implementing Decisions (EU) 2016/2219 ⁽⁵⁾, (EU) 2016/2279 ⁽⁶⁾, (EU) 2016/2367 ⁽⁷⁾, (EU) 2017/14 ⁽⁸⁾, (EU) 2017/116 ⁽⁹⁾ and (EU) 2017/155 ⁽¹⁰⁾ following further outbreaks of highly pathogenic avian influenza of subtype H5N8 in Bulgaria, the Czech Republic, Germany, Greece, France, Croatia, Italy, Hungary, the Netherlands, Austria, Poland, Romania, Slovakia, Sweden and the United Kingdom.
 - (12) Since the adoption of Implementing Decision (EU) 2017/155, Bulgaria, the Czech Republic, Germany, Greece, France, Italy, Hungary, Poland, Romania, Slovakia, Sweden and the United Kingdom have reported further outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry and have taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around outbreaks. In all cases, the Commission examined the measures taken by the concerned Member States in accordance with Directive 2005/94/EC and satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authorities of the concerned Member States, were at a sufficient distance to any holding where an outbreak had been confirmed.
 - (13) In addition, surveillance zones are still in place in Croatia and Austria due to previous outbreaks in these Member States. Implementing Decision (EU) 2016/2122 was adopted, and subsequently duly amended, in order to rapidly describe at Union level the protection and surveillance zones established in the concerned Member States in accordance with Directive 2005/94/EC, so as to prevent any unnecessary disturbance to trade within the Union and to avoid unjustified barriers to trade being imposed by third countries.
 - (14) The current epidemiological situation is still evolving. Highly pathogenic avian influenza virus of subtype H5N8 virus continues to be identified in wild birds and in poultry or other captive birds in many Member States. In addition, a highly pathogenic avian influenza virus of subtype H5N5 has recently been detected in a number of wild birds of different species, mainly found dead, in Germany, Italy, Croatia, Greece, Poland, the Netherlands and Slovenia. Germany has also notified the Commission of outbreaks of highly pathogenic avian influenza of subtype H5N5 in holdings on its territory where poultry are kept.
 - (15) Wild birds, in particular wild migratory water birds, are known to be the natural host for avian influenza viruses. The presence of different subtypes of highly pathogenic avian influenza viruses in wild birds is not unusual, but poses a continuing threat for the direct and indirect introduction of those viruses into holdings where poultry or other captive birds are kept with the risk of the possible subsequent virus spread from an infected holding to other holdings. In addition, the risk for re-assortment and the emergence of new virus subtypes increases.
 - (16) On 20 December 2016, EFSA published the statement: 'Urgent request on avian influenza' ⁽¹¹⁾ recommending that preventive and control measures should be addressed to highly pathogenic avian influenza subtypes of both H5 and H7 subtypes, as there is no scientific justification to have a differentiated approach.
 - (17) Likewise, the Terrestrial Code of the World Organisation for Animal Health (OIE) recommends for highly pathogenic avian influenza subtypes of both H5 and H7 subtypes, the application of the same standards for international trade in live poultry and poultry products.
 - (18) Given the evolving epidemiological situation in the Union, and taking into account the seasonality of virus circulation in wild birds, there is a risk that further outbreaks of different subtypes of highly pathogenic avian influenza will occur in the Union in the coming months.
 - (19) The Commission is therefore together with Member States continuously assessing the epidemiological situation and keeping the measures under review.
 - (20) For reasons of clarity and taking into account the current co-circulation of two and possibly more different highly pathogenic avian influenza viruses during the current epidemic, it is appropriate to extend the scope of the current protection measures in Implementing Decision (EU) 2016/2122 in order to cover all highly pathogenic avian influenza viruses as defined in Annex I to Directive 2005/94/EC, as well as to keep the Member States, third countries and stakeholders up-to-date on the current epidemiological situation. The protection and surveillance zones that have been established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, should be listed again in a single act and the duration of the regionalisation should be fixed taking into account the epidemiology of highly pathogenic avian influenza.
 - (21) Implementing Decision (EU) 2016/2122 should therefore be repealed and replaced by this act.
 - (22) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/417

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in holdings where poultry or other captive birds are kept in Bulgaria, the Czech Republic, Germany, Greece, France,

Croatia, Italy, Hungary, Austria, Poland, Romania, Slovakia, Sweden and the United Kingdom ('the concerned Member States') and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.

- (2) *Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision.*
- (3) *Since the date of adoption of Implementing Decision (EU) 2017/247, Bulgaria, the Czech Republic, Germany, Greece, France, Croatia, Italy, Hungary, Poland, Romania, Slovakia and the United Kingdom have notified the Commission of further outbreaks of avian influenza of subtype H5 in holdings outside the areas listed in the Annex to that Implementing Decision where poultry or other captive birds are kept and they have taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around those new outbreaks.*
- (4) *In addition, Spain has now notified the Commission of outbreaks of avian influenza of subtype H5 in holdings on its territory where poultry or other captive birds are kept and it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around those outbreaks. This Member State is not currently listed in the Annex to Implementing Decision (EU) 2017/247.*
- (5) *Furthermore, Austria has established surveillance zones in accordance with Directive 2005/94/EC in relation to outbreaks confirmed in the Czech Republic and Slovakia, as well as Bulgaria that has established a surveillance zone in relation to an outbreak in Romania. Poland has also established a surveillance zone in relation to outbreaks in the Czech Republic.*
- (6) *In all cases, the Commission has examined the measures taken by Bulgaria, the Czech Republic, Germany, Greece, Spain, France, Croatia, Italy, Hungary, Austria, Poland, Romania, Slovakia and the United Kingdom in accordance with Directive 2005/94/EC and has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authorities of those Member States, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5 has been confirmed.*
- (7) *In order to prevent any unnecessary disturbance to trade within the Union and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Bulgaria, the Czech Republic, Germany, Greece, Spain, France, Croatia, Italy, Hungary, Austria, Poland, Romania, Slovakia and the United Kingdom, the new protection and surveillance zones established in those Member States in accordance with Directive 2005/94/EC. Therefore, the areas listed for those Member States in the Annex to Implementing Decision (EU) 2017/247 should be amended.*
- (8) *Accordingly, the Annex to Implementing Decision (EU) 2017/247 should be amended to update regionalisation at Union level to include the new protection and surveillance zones established in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.*
- (9) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (10) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2017/554

- (1) *Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States') and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.*
- (2) *Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision.*
- (3) *Following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union, namely in Bulgaria, the Czech Republic, Germany, Greece, Spain, France, Croatia, Italy, Hungary, Austria, Poland, Romania, Slovakia and the United Kingdom, the Annex to Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/417 in order to amend the areas listed in the Annex to Implementing Decision (EU) 2017/247 to take account of developments in the epidemiological situation in the Union and the establishment of new protection and surveillance zones by the competent authorities of those Member States, in accordance with Directive 2005/94/EC.*
- (4) *Since the date of the amendments made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/417, the Czech Republic, Germany, France, Croatia, Italy, Austria, Poland and Romania have notified the Commission of further outbreaks of avian influenza of subtype H5 in holdings outside the areas listed in the Annex to Implementing Decision (EU) 2017/247, as amended by Implementing Decision (EU) 2017/417, where poultry or other captive birds are kept and they have taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around those new outbreaks.*
- (5) *In addition, Germany has established a surveillance zone in accordance with Directive 2005/94/EC in relation to an outbreak confirmed in the Czech Republic.*
- (6) *In all cases, the Commission has examined the measures taken by the Czech Republic, Germany, France, Croatia, Italy, Austria, Poland and Romania in accordance with Directive 2005/94/EC and has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authorities of those Member States, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5 has been confirmed.*
- (7) *In order to prevent any unnecessary disturbance to trade within the Union and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with the Czech Republic, Germany, France, Croatia, Italy, Austria, Poland and Romania, the new protection and surveillance zones established in those Member States in accordance with Directive 2005/94/EC. Therefore, the areas listed for those Member States in the Annex to Implementing Decision (EU) 2017/247 should be amended.*
- (8) *Accordingly, the Annex to Implementing Decision (EU) 2017/247 should be amended to update regionalization at Union level to include the new protection and surveillance zones established in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.*
- (9) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (10) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2017/696

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States') and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision.
- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417 and (EU) 2017/554, in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following the evolution of the epidemiological situation as regards highly pathogenic avian influenza.
- (4) Since the date of the amendments made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/554, the epidemiological situation as regards highly pathogenic avian influenza has improved. Accordingly, the protective measures laid down in Implementing Decision (EU) 2017/247 should be adapted to ensure that they are appropriate to cover the level of risks associated with the current epidemiological situation, and that they do not place burdens on operators that are disproportionate to the risks involved in the spread of that disease. It should be borne in mind that the current epidemic is causing a major disruption of operators' businesses, in particular for very specialised integrated production involving more than one Member State. Also, any amendments to the protective measures laid down in Implementing Decision (EU) 2017/247 should take into account the varying levels of risks associated with the movements of different poultry commodities.
- (5) Day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza, in particular as the time period between the collection of the hatching eggs and the time of hatch of the day-old chicks permits the timely detection of infection with highly pathogenic avian influenza viruses in the poultry holding of origin and provided that the hatchery of dispatch can ensure by its biosecurity and traceability measures that a proper level of disease control is maintained.
- (6) In addition, any amendments to the current protective measures laid down in Implementing Decision (EU) 2017/247 should be consistent with other rules laid down in Directive 2005/94/EC and also in Council Directive 2009/158/EC. Directive 2009/158/EC lays down general health rules governing trade within the Union in poultry and hatching eggs, including the veterinary certificates required to accompany consignments of those commodities dispatched to other Member States.
- (7) Article 6 of Directive 2009/158/EC provides that in order to be traded within the Union, day-old chicks and hatching eggs are to come from establishments which are not located in an area which for animal health reasons is subject to restrictive measures in accordance with Union legislation, as a result of an outbreak of a disease to which poultry are susceptible. Article 2 of Directive 2009/158/EC defines establishments as covering, inter alia, breeding establishments which are establishments which produce hatching eggs for the production of productive poultry, and hatcheries which are establishments which incubate and hatch eggs and supply day-old chicks.
- (8) Directive 2005/94/EC lays down specific rules to combat outbreaks of avian influenza in the Union. Article 30 of that Directive lays down the measures to be applied in the surveillance zone, including restrictions on the movements of day-old chicks and hatching eggs within the surveillance zone, and the conditions whereby the competent authority may authorise the dispatch of consignments of day-old chicks and hatching eggs from a surveillance zone.
- (9) Point (c)(iii) of Article 30 of Directive 2005/94/EC provides that the competent authority may authorise the direct transport of day-old chicks from the surveillance zone to any other holding, if they originate from hatching eggs from poultry holdings located outside the protection and surveillance zones and subject to certain conditions.
- (10) In addition, point (c)(iv) of Article 30 of Directive 2005/94/EC provides that the competent authority may authorise the direct transport of hatching eggs to a hatchery designated by the competent authority located inside or outside the surveillance zone provided that the hatching eggs and their packaging are disinfected before dispatch and the tracing of these eggs is ensured.
- (11) Accordingly, in order to prevent any disruption to trade in consignments of day-old chicks and hatching eggs from the surveillance zone, which pose a low risk for the spread of highly pathogenic avian influenza, but which could prove very costly for economic operators, it is necessary to lay down in Implementing Decision (EU) 2017/247, the protective measures applicable to such consignments in accordance with the prevailing rules already laid down in Directives 2005/94/EC.
- (12) In addition, in order to verify compliance with the requirements of Implementing Decision (EU) 2017/247, as amended by this Implementing Decision, it is appropriate that the veterinary certificates provided for in Article 20 of Directive 2009/158/EC, that are required to accompany consignments of day-old chicks, include a reference to Implementing Decision (EU) 2017/247 to that effect.
- (13) It is also necessary to amend the Annex to Implementing Decision (EU) 2017/247, as since the date of the last amendments made to that Annex by Implementing Decision (EU) 2017/554, Bulgaria, the Czech Republic, Germany, Greece, France and Romania have notified the Commission of further outbreaks of avian influenza of subtype H5 in holdings outside the areas currently listed in the Annex to Implementing Decision (EU) 2017/247, and they have taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around those new outbreaks.
- (14) In all cases, the Commission has examined the measures taken by Bulgaria, the Czech Republic, Germany, Greece, France and Romania in accordance with Directive 2005/94/EC, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authorities of those Member States, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5 has been confirmed.
- (15) In order to prevent any unnecessary disturbance to trade within the Union and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Bulgaria, the Czech Republic, Germany, Greece, France and Romania, the new protection and surveillance zones established in those Member States in accordance with Directive 2005/94/EC. Therefore, the areas listed for those Member States in the Annex to Implementing Decision (EU) 2017/247 should be amended.
- (16) Accordingly, Implementing Decision (EU) 2017/247 should be amended to include rules for the dispatch of day-old chicks from surveillance zones or the dispatch of day-old chicks from hatching eggs originating from poultry in establishments located in the surveillance zone to other Member States, subject to certain conditions, and to update regionalization at Union level to include the new protection and surveillance zones established in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (17) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (18) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/780

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417, (EU) 2017/554 and (EU) 2017/696, in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.
- (4) While there has been a general overall improvement in the epidemiological situation in the Union as regards highly pathogenic avian influenza, since the date of the last amendments made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/696, Germany, Italy, Hungary, Slovakia and Sweden have notified the Commission of further outbreaks of highly pathogenic avian influenza of subtype H5 in holdings located outside the areas currently listed in the Annex to Implementing Decision (EU) 2017/247 for those Member States, and they have taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around those new outbreaks.
- (5) Hungary has also established a surveillance zone in accordance with Directive 2005/94/EC in relation to an outbreak confirmed in Slovakia, near the boundary with Hungary.
- (6) In addition, as a precautionary measure against the spread of highly pathogenic avian influenza of subtype H5, France has decided to prolong the duration of the measures to be applied in the protection and surveillance zones for that Member State, as listed in the Annex to Implementing Decision (EU) 2017/247.
- (7) The Commission has examined the measures taken by Germany, Italy, Hungary, Slovakia and Sweden in accordance with Directive 2005/94/EC, following the latest outbreaks of avian influenza of subtype H5 in those Member States, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authorities of those Member States, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5 has been confirmed.
- (8) The Commission has also examined the dates put forward by France for the prolongation of the measures to be applied in the protection and surveillance zones listed for that Member State in the Annex to Implementing Decision (EU) 2017/247, and those new dates are appropriate on the basis of the information received by it regarding the epidemiological situation in that Member State.
- (9) In order to prevent any unnecessary disturbance to trade within the Union and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Germany, Italy, Hungary, Slovakia and Sweden, the new protection and surveillance zones established in those Member States in accordance with Directive 2005/94/EC. Therefore, the areas listed for those Member States in the Annex to Implementing Decision (EU) 2017/247 should be amended. In addition, it is appropriate to amend the dates for the application of the protective measures to be applied in the protection and surveillance zones for France, as set out in that Annex.
- (10) Accordingly, the Annex to Implementing Decision (EU) 2017/247 should be amended to update regionalization at Union level to include the new protection and surveillance zones established in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein, as well as the prolongation of the protective measures in the areas listed for France in that Annex.
- (11) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (12) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/819

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417, (EU) 2017/554, (EU) 2017/696 and (EU) 2017/780, in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.
- (4) While there has been a significant improvement in the epidemiological situation in the Union as regards highly pathogenic avian influenza, since the date of the last amendments made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/780, the United Kingdom has notified the Commission of further outbreaks of highly pathogenic avian influenza of subtype H5 in holdings located outside the areas currently listed in the Annex to Implementing Decision (EU) 2017/247 for that Member

State. It has also notified that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around those new outbreaks.

- (5) The Commission has examined the measures taken by the United Kingdom in accordance with Directive 2005/94/EC, following the latest outbreaks of avian influenza of subtype H5 in that Member State, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authorities of that Member State, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5 has been confirmed.
- (6) In order to prevent any unnecessary disturbance to trade within the Union and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with the United Kingdom, the new protection and surveillance zones established in that Member State in accordance with Directive 2005/94/EC. Therefore, the areas listed for that Member State in the Annex to Implementing Decision (EU) 2017/247 should be amended.
- (7) Accordingly, the Annex to Implementing Decision (EU) 2017/247 should be amended to update regionalization at Union level to include the new protection and surveillance zones established in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (8) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (9) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/977

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417, (EU) 2017/554, (EU) 2017/696, (EU) 2017/780 and (EU) 2017/819, in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.
- (4) While the overall disease situation in the Union has been steadily improving, there have been a few further outbreaks since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/819. Italy and the United Kingdom have each notified the Commission of one new outbreak of highly pathogenic avian influenza of subtype H5N8 in poultry in holdings located outside the areas currently listed in the Annex to Implementing Decision (EU) 2017/247 for these Member States. In addition, Luxembourg has notified the Commission of the first case of the detection of the highly pathogenic avian influenza virus of subtype H5N8 in holdings keeping captive birds. Those three Member States have also notified the Commission that they have taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around these new outbreaks.
- (5) The Commission has examined the measures taken by Italy, the United Kingdom and Luxembourg in accordance with Directive 2005/94/EC, following the recent outbreaks of avian influenza of subtype H5N8 in these Member States, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authorities of these Member States, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5 has been confirmed.
- (6) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy, the United Kingdom and Luxembourg, the new protection and surveillance zones established in these Member States in accordance with Directive 2005/94/EC. Therefore, the areas listed for Italy and the United Kingdom in the Annex to Implementing Decision (EU) 2017/247 should be amended, and new areas for Luxembourg should be inserted in that Annex.
- (7) Accordingly, the Annex to Implementing Decision (EU) 2017/247 should be amended to update regionalisation at Union level to include the new protection and surveillance zones established in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (8) In addition, Implementing Decision (EU) 2017/247 applies until 30 June 2017. Due to the current outbreaks confirmed in Italy, the United Kingdom and Luxembourg, the measures to be implemented by these Member States in the new areas for them to be listed in the Annex to that Implementing Decision will continue to be in place after that date. It is therefore appropriate to prolong the period of application of Implementing Decision (EU) 2017/247 until 31 December 2017, taking into account the measures to be applied in those three Member States, and in case further outbreaks of highly pathogenic avian influenza occur in the Union.
- (9) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (10) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1139

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Di-

rective 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.

- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417, (EU) 2017/554, (EU) 2017/696, (EU) 2017/780, (EU) 2017/819 and (EU) 2017/977, in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.
- (4) Furthermore, the period of application of Implementing Decision (EU) 2017/247 was prolonged until 31 December 2017 by Implementing Decision (EU) 2017/977, in order to take account of the dates for the implementation of measures in the new areas listed in the Annex to Implementing Decision (EU) 2017/247, as amended by Implementing Decision (EU) 2017/977.
- (5) The overall disease situation in the Union has been steadily improving. Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/977, only Belgium has detected new outbreaks of highly pathogenic avian influenza of subtype H5N8 in captive bird holdings. It has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around infected holdings. In relation to the other outbreaks in Belgium in small non-commercial holdings, the competent authority has granted a derogation from the zoning requirements, as provided for in Article 16(2) of Directive 2005/94/EC, following a risk assessment.
- (6) France has also established a surveillance zone, in accordance with Directive 2005/94/EC, in relation to the recent outbreaks confirmed in Belgium in captive bird holdings, near the boundary with France.
- (7) The Commission has examined the measures taken by Belgium and France in accordance with Directive 2005/94/EC, following the recent outbreaks of avian influenza of subtype H5N8 in Belgium, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authority of Belgium and the surveillance zone established in France, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5 has been confirmed and that the derogation from the zoning requirements, granted by the competent authority in Belgium, was done in accordance with the requirements laid down in Directive 2005/94/EC.
- (8) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Belgium and France, the protection and surveillance zones established in Belgium as well as the surveillance zone established in France, in accordance with Directive 2005/94/EC, following the recent outbreaks in Belgium. Therefore, the new areas for Belgium and France should be inserted in the Annex to Implementing Decision (EU) 2017/247.
- (9) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalisation at Union level to include the protection and surveillance zones established by Belgium, and the surveillance zone established in France, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (10) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (11) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1240

- (1) Commission Implementing Decision (EU) 2017/247⁽³⁾ was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC⁽⁴⁾.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417⁽⁵⁾, (EU) 2017/554⁽⁶⁾, (EU) 2017/696⁽⁷⁾, (EU) 2017/780⁽⁸⁾, (EU) 2017/819⁽⁹⁾, (EU) 2017/977⁽¹⁰⁾ and (EU) 2017/1139⁽¹¹⁾, in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.
- (4) While the overall disease situation in the Union has been steadily improving, since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1139, France has detected a new outbreak of highly pathogenic avian influenza of subtype H5N8 in a rural poultry holding in Brillion in northern France near the border with Belgium. It has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around the infected holding.
- (5) Belgium has also established a surveillance zone, in accordance with Directive 2005/94/EC, in Brunehaut and Rumes in northern Belgium near the border with France, in relation to the recent outbreak confirmed in France.
- (6) The Commission has examined the measures taken by France and Belgium in accordance with Directive 2005/94/EC, following the recent outbreak of avian influenza of subtype H5N8 in northern France, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authority of France, and the surveillance zone established in Belgium, are at a sufficient distance to the holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.
- (7) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with France and Belgium, the protec-

tion and surveillance zones established in France as well as the surveillance zone established in Belgium, in accordance with Directive 2005/94/EC, following the recent outbreak in France. Therefore, the new areas for France and Belgium should be inserted in the Annex to Implementing Decision (EU) 2017/247.

- (8) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level to include the protection and surveillance zones established by France as well as the surveillance zone established in Belgium, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (9) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (10) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1397

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417, (EU) 2017/554, (EU) 2017/696, (EU) 2017/780, (EU) 2017/819, (EU) 2017/977, (EU) 2017/1139 and (EU) 2017/1240 in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.
- (4) The overall disease situation in the Union has been steadily improving. Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1240, only Italy has detected new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, namely in the region of Lombardia of that Member State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around the infected poultry holdings.
- (5) The Commission has examined the measures taken by Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of avian influenza of subtype H5N8 in that Member State, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authority of Italy, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.
- (6) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy, the protection and surveillance zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza of subtype H5N8 in that Member State. Therefore, the entries for Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the current epidemiological situation in that Member State as regards that disease.
- (7) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalisation at Union level to include the protection and surveillance zones established by Italy, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (8) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (9) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1415

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417, (EU) 2017/554, (EU) 2017/696, (EU) 2017/780, (EU) 2017/819, (EU) 2017/977, (EU) 2017/1139, (EU) 2017/1240 and (EU) 2017/1397 in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.
- (4) The overall disease situation in the Union has been steadily improving. However, since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1397, Italy has detected new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, namely in the regions of Lombardia and Veneto of that Member

State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around the infected poultry holdings.

- (5) The Commission has examined the measures taken by Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of avian influenza of subtype H5N8 in that Member State, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authority of Italy, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.
- (6) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy, the protection and surveillance zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza of subtype H5N8 in that Member State. Therefore, the entries for Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the current epidemiological situation in that Member State as regards that disease.
- (7) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level to include the protection and surveillance zones established by Italy, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (8) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (9) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1484

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417, (EU) 2017/554, (EU) 2017/696, (EU) 2017/780, (EU) 2017/819, (EU) 2017/977, (EU) 2017/1139, (EU) 2017/1240, (EU) 2017/1397 and (EU) 2017/1415 in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.
- (4) The overall disease situation in the Union has been steadily improving. However, since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1397, Italy has detected and notified to the Commission new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, namely in the regions of Emilia Romagna, Lombardia and Veneto of that Member State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around the infected poultry holdings.
- (5) The Commission has examined the measures taken by Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of avian influenza of subtype H5N8 in that Member State, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authority of Italy, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.
- (6) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy, the protection and surveillance zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza of subtype H5N8 in that Member State. Therefore, the entries for Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in that Member State as regards that disease. In particular, the entries for certain areas in the regions of Lombardia and Veneto need to be amended and new entries for certain areas in the regions of Lombardia, Emilia Romagna and Veneto need to be added in order to address this new situation.
- (7) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalisation at Union level to include the protection and surveillance zones established by Italy, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (8) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (9) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1519

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Di-

rective 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.

- (3) *The Annex to Implementing Decision (EU) 2017/247 was subsequently amended by Commission Implementing Decisions (EU) 2017/417, (EU) 2017/554, (EU) 2017/696, (EU) 2017/780, (EU) 2017/819, (EU) 2017/977, (EU) 2017/1139, (EU) 2017/1240, (EU) 2017/1397, (EU) 2017/1415 and (EU) 2017/1484 in order to take account of changes to the protection and surveillance zones established by the competent authorities of the Member States in accordance with Directive 2005/94/EC, following further outbreaks of highly pathogenic avian influenza of subtype H5 in the Union. In addition, Implementing Decision (EU) 2017/247 was amended by Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247, following certain improvements in the epidemiological situation as regards that virus in the Union.*
- (4) *The overall disease situation in the Union has been steadily improving. However, since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1484, Italy has detected and notified to the Commission new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, namely in the regions of Lombardia and Veneto of that Member State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around the infected poultry holdings.*
- (5) *The Commission has examined the measures taken by Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of avian influenza of subtype H5N8 in that Member State, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authority of Italy, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.*
- (6) *In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy, the protection and surveillance zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza of subtype H5N8 in that Member State. Therefore, the entries for Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in that Member State as regards that disease. In particular, new entries for certain areas in the regions of Lombardia and Veneto need to be added in order to address this new situation.*
- (7) *The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level to include the protection and surveillance zones established by Italy, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.*
- (8) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (9) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2017/1593

- (1) *Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.*
- (2) *Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.*
- (3) *Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In addition, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.*
- (4) *In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times to take account of changes in the boundaries of the protection and surveillance zones established by the Member States concerned in accordance with Directive 2005/94/EC. That Annex was last amended by Commission Implementing Decision (EU) 2017/1519, following the notification by Italy of outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings in the regions of Lombardia and Veneto, and the establishment of protection and surveillance zones by that Member State around the infected poultry holdings in accordance with Directive 2005/94/EC.*
- (5) *Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1519, Italy has detected and notified to the Commission new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, again located in the regions of Lombardia and Veneto of that Member State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around the infected poultry holdings.*
- (6) *The Commission has examined the measures taken by Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of avian influenza of subtype H5N8 in that Member State, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authority of Italy, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.*
- (7) *In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy, the protection and surveillance zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza of subtype H5N8 in that Member State. Therefore, the entries for Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in that Member State as regards*

that disease. In particular, new entries for certain areas in the regions of Lombardia and Veneto need to be added in order to address this new situation.

- (8) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level to include the protection and surveillance zones established by Italy following the new outbreaks of highly pathogenic avian influenza in the regions of Lombardia and Veneto, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (9) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (10) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1841

- (1) Commission Implementing Decision (EU) 2017/247, as last amended by Commission Implementing Decision (EU) 2017/1593, was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision.
- (3) Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (4) Depending on the epidemiological situation as regards highly pathogenic avian influenza, a concerned Member State may establish further restricted zones around or adjacent to the protection and surveillance zones in accordance with Article 16(4) of Directive 2005/94/EC.
- (5) In order to strengthen disease control, concerned Member States should establish further restricted zones on their territory where the epidemiological enquiry has identified a serious risk for disease spread taking into account the criteria laid down in Article 16(3) of the Directive 2005/94/EC which include, inter alia, the geographical situation, the location and proximity of holdings and the estimated number of poultry, their movements and trade patterns, and facilities and personnel available to implement the control of these zones.
- (6) In addition, Article 32 of that Directive lays down that the competent authority may provide that some or all of the measures to be applied in the protection and surveillance zones are to apply inside the further restricted zones.
- (7) For reasons of clarity, and in order to keep the Member States, third countries and stakeholders up-to-date on the evolution of the epidemiological situation in the Union, those further restricted zones should also be covered by Implementing Decision (EU) 2017/247 and listed in the Annex thereto. That Annex should set out the date for the maintenance of the application of the protection measures in the further restricted zones, taking into account the epidemiological situation in the Union as regards highly pathogenic avian influenza.
- (8) The concerned Member States should prohibit the dispatch of consignments of live poultry, day-old chicks and hatching eggs from the areas listed as further restricted zones in the Annex to Implementing Decision (EU) 2017/247 to other Member States, except where the concerned Member States authorise the dispatch of such consignments subject to specific conditions.
- (9) Implementing Decision (EU) 2017/247 as amended by Commission Implementing Decision (EU) 2017/696 in order to lay down conditions for the dispatch of consignments of day-old chicks from areas listed as protection and surveillance zones in the Annex thereto taking into account the low risk for the spread of highly pathogenic avian influenza by this commodity. Similar conditions should also apply for the dispatch from the concerned Member State of day-old chicks from further restricted zones as listed in the Annex to Implementing Decision (EU) 2017/247 to other Member States.
- (10) In addition, the concerned Member States should be permitted to authorise the dispatch of hatching eggs from further restricted zones as they are unlikely to transmit highly pathogenic avian influenza to other poultry in particular as their surface must be disinfected before dispatch to other Member States and the hatchery of origin and of destination must comply with the required hygiene rules laid down in Annex II to Council Directive 2009/158/EC.
- (11) Implementing Decision (EU) 2017/247 should therefore be amended in order to lay down the conditions whereby the concerned Member States of dispatch may authorise the dispatch of day-old chicks and hatching eggs from further restricted zones to other Member States.
- (12) The Annex to Implementing Decision (EU) 2017/247 should be amended in order to include a new Part C listing the further restricted zones established by the concerned Member State, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable in the further restrictive zones.
- (13) Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/977, in order to extend its date of application until 31 December 2017.
- (14) Due to the increasing risk for the seasonal occurrence of that disease within the Union, the measures to be applied in areas listed in the Annex to that Implementing Decision could continue after that date in the case of further outbreaks in the Union. It is therefore appropriate to prolong the period of application of Implementing Decision (EU) 2017/247 until 31 May 2018.
- (15) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (16) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1845

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down

that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.

- (3) Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In addition, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.
- (4) Commission Implementing Decision (EU) 2017/1841 laid down provisions for the establishment of further restricted zones in concerned Member States in order to strengthen disease control when there is an increased risk for virus spread and the dispatch of day-old chicks and hatching eggs from those zones to other Member States under certain safety conditions. The Annex was amended in order to include the further restricted zones.
- (5) In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times to take account of changes in the boundaries of the protection and surveillance zones established by the Member States concerned in accordance with Directive 2005/94/EC. That Annex was last amended by Commission Implementing Decision (EU) 2017/1593⁽⁷⁾, following the notification by Italy of outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings in the regions of Lombardia and Veneto, and the establishment of protection and surveillance zones by that Member State around the infected poultry holdings in accordance with Directive 2005/94/EC.
- (6) Since the amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1593, Italy has detected and notified to the Commission new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, again located in the regions of Lombardia and Veneto of that Member State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around the infected poultry holdings.
- (7) The Commission has examined the measures taken by Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of avian influenza of subtype H5N8 in that Member State, and it has satisfied itself that the boundaries of the protection and surveillance zones, established by the competent authority of Italy, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.
- (8) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy, the protection and surveillance zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza of subtype H5N8 in that Member State. Therefore, the entries for Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in that Member State as regards that disease. In particular, new entries for certain areas in the regions of Lombardia and Veneto need to be added in order to address this new situation.
- (9) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level to include the protection and surveillance zones established by Italy following the new outbreaks of highly pathogenic avian influenza in the regions of Lombardia and Veneto, in accordance with Directive 2005/94/EC and the duration of the restrictions applicable therein.
- (10) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (11) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1930

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.
- (4) Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.
- (5) In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times to take account of changes in the boundaries of the protection and surveillance zones established by the Member States concerned in accordance with Directive 2005/94/EC. The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2017/1845, following the notification by Italy of further outbreaks of highly pathogenic avian influenza of subtype

- H5N8 in poultry holdings in the regions of Lombardia and Veneto, and the establishment of protection, surveillance and further restricted zones by that Member State around the infected poultry holdings in accordance with Directive 2005/94/EC.
- (6) Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1845, Italy has notified the Commission of new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, located in the regions of Lombardia, Veneto and Emilia Romagna of that Member State. In addition, Bulgaria has recently notified the Commission of an outbreak of highly pathogenic avian influenza of subtype H5N8 in a holding keeping ducks located in the region of Dobrich of that Member State.
 - (7) Italy and Bulgaria have also notified the Commission that they have taken the necessary measures required in accordance with Directive 2005/94/EC, including the establishment of protection and surveillance zones around all the infected holdings. Italy has also notified the Commission that it has enlarged the further restricted zones established around the surveillance zones in certain areas at increased risk for the spread of highly pathogenic avian influenza.
 - (8) The Commission has examined the measures taken by Italy and Bulgaria in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and it is satisfied that the boundaries of the protection and surveillance zones, and in the case of Italy the further restricted zones, established by the competent authorities of those two Member States, are at a sufficient distance to any holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.
 - (9) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy and Bulgaria, the protection and surveillance zones established in Italy and Bulgaria, and the further restricted zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States. Therefore, the entries for Italy and Bulgaria in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in those two Member States as regards that disease. In particular, new entries for the zones in the regions of Lombardia, Veneto and Emilia Romagna in Italy, and the zones in the region of Dobrich in Bulgaria, now subject to restrictions in accordance with Directive 2005/94/EC should be added to lists in the Annex to Implementing Decision (EU) 2017/247.
 - (10) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalisation at Union level to include the protection and surveillance zones established in Italy and Bulgaria, and further restricted zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those two Member States, and the duration of the restrictions applicable therein.
 - (11) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
 - (12) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/1969

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.
- (4) Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.
- (5) In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC. The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2017/1930, following the notification by Italy and Bulgaria of further outbreaks of highly pathogenic avian influenza in those two Member States. Italy notified the Commission of outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings in the regions of Lombardia, Veneto and Emilia Romagna, and the establishment of protection, surveillance and further restricted zones by that Member State around the infected poultry holdings in accordance with Directive 2005/94/EC. Bulgaria notified the Commission of an outbreak of highly pathogenic avian influenza of subtype H5N8 in a holding keeping ducks in the region of Dobrich, and the establishment of protection and surveillance zones around the infected holding in accordance with Directive 2005/94/EC.
- (6) Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1930, Italy has notified the Commission of new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, located in the regions of Lombardia and Veneto of that Member State. In addition, Bulgaria has notified the Commission of a further outbreak of highly pathogenic avian influenza of subtype H5N8 in a poultry holding located in the region of Haskovo of that Member State.

- (7) *Bulgaria and Italy have also notified the Commission that they have taken the necessary measures required in accordance with Directive 2005/94/EC following those recent outbreaks, including the establishment of protection and surveillance zones around all the infected poultry holdings.*
- (8) *The Commission has examined the measures taken by Bulgaria and Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and it is satisfied that the boundaries of the protection and surveillance zones established by the competent authorities of Bulgaria and Italy are at a sufficient distance to any poultry holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.*
- (9) *In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Bulgaria and Italy, the protection and surveillance zones established in Bulgaria and Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States. Therefore, the entries for Bulgaria and Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in those two Member States as regards that disease. In particular, new entries for the protection and surveillance zones in the region of Haskovo in Bulgaria, and in the regions of Lombardia and Veneto in Italy, now subject to restrictions in accordance with Directive 2005/94/EC, should be added to the lists in the Annex to Implementing Decision (EU) 2017/247.*
- (10) *The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level to include the protection and surveillance zones established in Bulgaria and Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those two Member States, and the duration of the restrictions applicable therein.*
- (11) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (12) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2017/2000

- (1) *Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.*
- (2) *Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.*
- (3) *Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.*
- (4) *Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.*
- (5) *In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC. The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2017/1969, following the notification by Italy of further outbreaks of highly pathogenic avian influenza in the regions of Lombardia and Veneto and by Bulgaria of a further outbreak of this disease in the region of Haskovo in those two Member States. Italy and Bulgaria also notified the Commission of the establishment of protection and surveillance zones around the infected poultry holdings in accordance with Directive 2005/94/EC.*
- (6) *Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/1969, Italy has notified the Commission of new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, located in the region of Lombardia of that Member State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC following those recent outbreaks, including the establishment of protection and surveillance zones around all the infected poultry holdings.*
- (7) *The Commission has examined the measures taken by Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in that Member State, and it is satisfied that the boundaries of the protection and surveillance zones established by the competent authorities of Italy are at a sufficient distance to any poultry holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.*
- (8) *In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy, the protection and surveillance zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in that Member State. Therefore, the entries for Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in that Member State as regards that disease. In particular, new entries for the protection and surveillance zones in the region of Lombardia in Italy, now subject to restrictions in accordance with Directive 2005/94/EC, should be added to the lists in the Annex to Implementing Decision (EU) 2017/247.*

- (9) *The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level to include the protection and surveillance zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in that Member State, and the duration of the restrictions applicable therein.*
- (10) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (11) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2017/2175

- (1) *Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC .*
- (2) *Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.*
- (3) *Since the date of its adoption, Commission Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.*
- (4) *Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.*
- (5) *In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times, mainly to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC. The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2017/2000, following the notification by Italy of new outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings in the region of Lombardia in that Member State. Italy also notified the Commission that it had taken the necessary measures required in accordance with Directive 2005/94/EC following those outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings.*
- (6) *Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/2000, Bulgaria has notified the Commission of two recent outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings in the regions of Sliven and Yambol of that Member State. Bulgaria has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC following those recent outbreaks, including the establishment of protection and surveillance zones around all the infected poultry holdings.*
- (7) *In addition, Italy has notified the Commission of further outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, located in the regions of Lombardia, Piemonte and Lazio of that Member State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC following those recent outbreaks, including the establishment of protection and surveillance zones around all the infected poultry holdings and the enlargement of the established further restricted zones.*
- (8) *The Commission has examined the measures taken by Bulgaria and Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and it is satisfied that the boundaries of the protection and surveillance zones established by the competent authorities of those two Member States are at a sufficient distance to any poultry holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed. The Commission has also examined the boundaries of the further restricted zones established by the competent authority in Italy following the recent outbreaks in that Member State, and it is satisfied that the extent of the areas covered by the enlargement of those further restricted zones is sufficient taking into account the current epidemiological situation in Italy.*
- (9) *In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Bulgaria and Italy, the protection and surveillance zones established in those two Member States, and the enlarged further restricted zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States. Therefore, the entries for Bulgaria and Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in those Member States as regards that disease. In particular, new entries for the protection and surveillance zones in Bulgaria and Italy and for the enlarged further restricted zones in Italy, now subject to restrictions in accordance with Directive 2005/94/EC, should be added to the lists in the Annex to Implementing Decision (EU) 2017/247.*
- (10) *The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level in order to include the protection and surveillance zones established in Bulgaria and Italy, and the enlarged further restricted zones established in Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and the duration of the restrictions applicable therein.*
- (11) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (12) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2017/2289

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.
- (4) Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.
- (5) In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times, mainly to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC. The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2017/2175, following the notification by Bulgaria and Italy of new outbreaks of highly pathogenic avian influenza in those Member States. Bulgaria notified the Commission of two outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings in the regions of Sliven and Yambol of that Member State. Italy notified the Commission of outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings in the regions of Lombardia, Piemonte and Lazio of that Member State. Those Member States also notified the Commission that they had duly taken the necessary measures required in accordance with Directive 2005/94/EC following those outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings, and in the case of Italy the enlargement of the further restricted zones.
- (6) Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/2175, Bulgaria has notified the Commission of a recent outbreak of highly pathogenic avian influenza of subtype H5N8 in a poultry holding in the region of Stara Zagora of that Member State. Bulgaria has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC following that recent outbreak, including the establishment of protection and surveillance zones around the infected poultry holding.
- (7) In addition, Italy has notified the Commission of further outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, located in the region of Lombardia and Veneto of that Member State. Italy has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC following these recent outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings.
- (8) The Commission has examined the measures taken by Bulgaria and Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and it is satisfied that the boundaries of the protection and surveillance zones established by the competent authorities of those two Member States are at a sufficient distance to any poultry holding where an outbreak of highly pathogenic avian influenza of subtype H5N8 has been confirmed.
- (9) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Bulgaria and Italy, the protection and surveillance zones established in those two Member States, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States. Therefore, the entries for Bulgaria and Italy in the Annex to Implementing Decision (EU) 2017/247 should be updated to take account of the up-to-date epidemiological situation in those Member States as regards that disease. In particular, new entries for the protection and surveillance zones in Bulgaria and Italy, now subject to restrictions in accordance with Directive 2005/94/EC, should be added to the lists in the Annex to Implementing Decision (EU) 2017/247.
- (10) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalisation at Union level in order to include the protection and surveillance zones established in Bulgaria and Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and the duration of the restrictions applicable therein.
- (11) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (12) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2017/2412

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down

that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.

- (3) Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.
- (4) Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.
- (5) In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times, mainly to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC.
- (6) The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2017/2289, following the notification by Bulgaria and Italy of further outbreaks of highly pathogenic avian influenza in those Member States. Bulgaria notified the Commission of one outbreak of highly pathogenic avian influenza of subtype H5N8 in a poultry holding in the region of Stara Zagora of that Member State. Italy notified the Commission of outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings in the regions of Lombardia and Veneto of that Member State. Those Member States also notified the Commission that they had duly taken the necessary measures required in accordance with Directive 2005/94/EC following those outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings.
- (7) Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/2289, the Netherlands has notified the Commission of a recent outbreak of highly pathogenic avian influenza of subtype H5N6 in a poultry holding in the province of Flevoland of that Member State. The Netherlands has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC following that recent outbreak, including the establishment of protection and surveillance zones around the infected poultry holding.
- (8) The Commission examined those measures in collaboration with the Netherlands, and was satisfied that the borders of the protection and surveillance zones, established by the competent authority in that Member State, were at a sufficient distance to the actual poultry holding where the outbreak was confirmed.
- (9) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it was necessary to rapidly describe at Union level, in collaboration with the Netherlands the protection and surveillance zones established in that Member State, in accordance with Directive 2005/94/EC, following the recent outbreak of highly pathogenic avian influenza in that Member State.
- (10) Pending the opinion of the Standing Committee on Plants, Animals, Food and Feed the Commission adopted interim protective measures taking into account the epidemiological situation in the Netherlands, in particular considering the risks associated with avian influenza being confirmed again in that Member State following several months without its detection, and the generally high density of poultry holdings in the Netherlands, which constitutes an increased risk for the spread of the virus. Those interim protective measures were aimed at preventing its spread without any delay.
- (11) Those interim protective measures in relation to highly pathogenic avian influenza in the Netherlands were adopted by Commission Implementing Decision (EU) 2017/2304 which lists in the Annex thereto, the areas that the competent authority of the Netherlands has established as protection and surveillance zones. That Implementing Decision applies until 10 January 2018.
- (12) It is necessary to review the interim protective measures laid down in Implementing Decision (EU) 2017/2304. The Netherlands has also provided regular updates on the epidemiological situation and no further outbreaks of highly pathogenic avian influenza have occurred on its territory.
- (13) Taking into account the favourable outcome of the epidemiological inquiries and the results of the laboratory investigations carried out in the protection and surveillance zones established by the competent authority of the Netherlands in accordance with Directive 2005/94/EC, it is appropriate to adapt the boundaries of the surveillance zone established in that Member State in accordance with that Directive at Union level. The new boundaries should be listed in the Annex to Implementing Decision (EU) 2017/247.
- (14) In addition, Italy has now notified the Commission of a new outbreak of highly pathogenic avian influenza on its territory in the region of Emilia Romagna. It has also notified the Commission that it has duly taken the necessary measures required in accordance with Directive 2005/94/EC following that outbreak, including the establishment of protection and surveillance zones around the infected poultry holding.
- (15) The Commission has examined the measures taken by the Netherlands and Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and it is satisfied that the boundaries of the protection and surveillance zones established by the competent authorities of those two Member States are at a sufficient distance to any poultry holding where an outbreak of highly pathogenic avian influenza has been confirmed.
- (16) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy and the Netherlands, the protection and surveillance zones established in those two Member States, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States.
- (17) Implementing Decision (EU) 2017/247 should therefore be updated to take account of the up-to-date epidemiological situation in Italy and the Netherlands as regards highly pathogenic avian influenza. In particular, the protection and surveillance zones in Italy and the Netherlands, now subject to restrictions in accordance with Directive 2005/94/EC, should be listed in the Annex to Implementing Decision (EU) 2017/247.
- (18) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level in order to include the protection and surveillance zones established in Italy and in the Netherlands in accordance with Directive

2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member State, and the duration of the restrictions applicable therein.

- (19) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (20) *Furthermore, as the Annex to Implementing Decision (EU) 2017/247, as amended by this Decision will list the protection and surveillance zones established by the competent authority of the Netherlands, in accordance with Directive 2005/94/EC, Implementing Decision (EU) 2017/2304 should be repealed.*
- (21) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2018/314

- (1) *Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC .*
- (2) *Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.*
- (3) *Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.*
- (4) *Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions. Implementing Decision (EU) 2017/1841 also amended Article 5 of Implementing Decision (EU) 2017/247 in order to prolong the period of application of that act until 31 May 2018.*
- (5) *In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times, mainly to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC.*
- (6) *The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2017/2412, following the notification by the Netherlands and Italy of outbreaks of highly pathogenic avian influenza in those Member States. Those Member States also notified the Commission that they had duly taken the necessary measures required in accordance with Directive 2005/94/EC following those outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings.*
- (7) *Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2017/2412, the Netherlands has notified the Commission of a new outbreak of highly pathogenic avian influenza of subtype H5N6 in a poultry holding in the province of Groningen, in the north of that Member State. The Netherlands has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC following that recent outbreak, including the establishment of protection and surveillance zones around the infected poultry holding.*
- (8) *The Commission has examined those measures in collaboration with the Netherlands, and is satisfied that the boundaries of the protection and surveillance zones, established by the competent authority in that Member State, are at a sufficient distance to the poultry holding where the outbreak was confirmed.*
- (9) *In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with the Netherlands the protection and surveillance zones established in that Member State, in accordance with Directive 2005/94/EC, following the recent outbreak of highly pathogenic avian influenza in that Member State.*
- (10) *Implementing Decision (EU) 2017/247 should therefore be updated to take account of the up-to-date epidemiological situation in the Netherlands as regards highly pathogenic avian influenza. In particular, the protection and surveillance zones in the Netherlands, now subject to restrictions in accordance with Directive 2005/94/EC, should be listed in the Annex to Implementing Decision (EU) 2017/247.*
- (11) *The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level in order to include the protection and surveillance zones established in the Netherlands in accordance with Directive 2005/94/EC, following the recent outbreak of highly pathogenic avian influenza in that Member State, and the duration of the restrictions applicable therein.*
- (12) *In addition, taking into account confirmation of the recent outbreak of highly pathogenic avian influenza in the Netherlands, and the continuing risk of further outbreaks of that disease in the Union, that can persist over prolonged periods of time even during the summer months, the measures laid down in that Implementing Decision should continue to apply until the end of the year. It is therefore appropriate to prolong the period of application of Implementing Decision (EU) 2017/247 until 31 December 2018.*
- (13) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (14) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2018/342

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.
- (4) Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.
- (5) In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times, mainly to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC.
- (6) The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2018/314, following the notification by the Netherlands of a new outbreak of highly pathogenic avian influenza in the province of Groningen of that Member State. The Netherlands also notified the Commission that it had duly taken the necessary measures required in accordance with Directive 2005/94/EC following that outbreak, including the establishment of protection and surveillance zones around the infected poultry holding.
- (7) Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2018/314, Bulgaria has notified the Commission of a new outbreak of highly pathogenic avian influenza of subtype H5N8 in a poultry holding in the region of Dobrich of that Member State. In addition, Italy has also notified the Commission of a new outbreak of highly pathogenic avian influenza of subtype H5N8 in the region of Lombardia of that Member State.
- (8) Bulgaria and Italy have also notified the Commission that they have taken the necessary measures required in accordance with Directive 2005/94/EC following those recent outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings in those Member States.
- (9) The Commission has examined those measures in collaboration with Bulgaria and Italy, and the Commission is satisfied that the boundaries of the protection and surveillance zones, established by the competent authorities of Bulgaria and Italy, are at a sufficient distance to the poultry holdings where the outbreaks were confirmed.
- (10) In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Bulgaria and Italy, the protection and surveillance zones established in Bulgaria and Italy, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States.
- (11) Implementing Decision (EU) 2017/247 should therefore be updated to take account of the up-to-date epidemiological situation in Bulgaria and Italy as regards highly pathogenic avian influenza. In particular, the protection and surveillance zones in Bulgaria and Italy, now subject to restrictions in accordance with Directive 2005/94/EC, should be listed in the Annex to Implementing Decision (EU) 2017/247.
- (12) The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalization at Union level in order to include the protection and surveillance zones established in Bulgaria and in Italy in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and the duration of the restrictions applicable therein.
- (13) Implementing Decision (EU) 2017/247 should therefore be amended accordingly.
- (14) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

(EU) 2018/418

- (1) Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.
- (2) Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.
- (3) Since the date of its adoption, Implementing Decision (EU) 2017/247 has been amended several times to take account of developments in the epidemiological situation in the Union as regards avian influenza. In particular, Implementing Decision (EU) 2017/247 was amended by Commission Implementing Decision (EU) 2017/696 in order to lay down rules regarding the dispatch

of consignments of day-old chicks from the areas listed in the Annex to Implementing Decision (EU) 2017/247. That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.

- (4) *Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.*
- (5) *In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times, mainly to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC.*
- (6) *The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2018/342, following the notification by Bulgaria of a new outbreak of highly pathogenic avian influenza of subtype H5N8 in the region of Dobrich in that Member State and the notification by Italy of a new outbreak of that disease in the region of Lombardia of that Member State. Bulgaria and Italy also notified the Commission that they had duly taken the necessary measures required in accordance with Directive 2005/94/EC following those outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings.*
- (7) *Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2018/342, Italy has notified the Commission of further outbreaks of highly pathogenic avian influenza of subtype H5N8 in poultry holdings, again in the region of Lombardia of that Member State. In addition, the Netherlands has also notified the Commission of a further outbreak of highly pathogenic avian influenza of subtype H5N6 in that Member State located in the province of Overijssel.*
- (8) *Italy and the Netherlands have also notified the Commission that they have taken the necessary measures required in accordance with Directive 2005/94/EC following those recent outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings in those Member States.*
- (9) *The Commission has examined those measures in collaboration with Italy and the Netherlands, and the Commission is satisfied that the boundaries of the protection and surveillance zones, established by the competent authorities of Italy and the Netherlands, are at a sufficient distance to the poultry holdings where the new outbreaks were confirmed.*
- (10) *In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Italy and the Netherlands, the protection and surveillance zones established in Italy and the Netherlands, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States.*
- (11) *Implementing Decision (EU) 2017/247 should therefore be updated to take account of the up-to-date epidemiological situation in Italy and the Netherlands, as regards highly pathogenic avian influenza. In particular, the protection and surveillance zones in Italy and the Netherlands, now subject to restrictions in accordance with Directive 2005/94/EC, should be listed in the Annex to Implementing Decision (EU) 2017/247.*
- (12) *The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalisation at Union level in order to include the protection and surveillance zones established in Italy and the Netherlands, in accordance with Directive 2005/94/EC, following the recent outbreaks of highly pathogenic avian influenza in those Member States, and the duration of the restrictions applicable therein.*
- (13) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (14) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

(EU) 2018/510

- (1) *Commission Implementing Decision (EU) 2017/247 was adopted following outbreaks of highly pathogenic avian influenza of subtype H5 in a number of Member States ('the concerned Member States'), and the establishment of protection and surveillance zones by the competent authority of the concerned Member States in accordance with Article 16(1) of Council Directive 2005/94/EC.*
- (2) *Implementing Decision (EU) 2017/247 provides that the protection and surveillance zones established by the competent authorities of the concerned Member States in accordance with Directive 2005/94/EC are to comprise at least the areas listed as protection and surveillance zones in the Annex to that Implementing Decision. Implementing Decision (EU) 2017/247 also lays down that the measures to be applied in the protection and surveillance zones, as provided for in Article 29(1) and Article 31 of Directive 2005/94/EC, are to be maintained until at least the dates for those zones set out in the Annex to that Implementing Decision.*

That amendment took into account the fact that day-old chicks pose a very low risk for the spread of highly pathogenic avian influenza compared to other poultry commodities.*
- (4) *Implementing Decision (EU) 2017/247 was also subsequently amended by Commission Implementing Decision (EU) 2017/1841 in order to strengthen the disease control measures applicable where there is an increased risk for the spread of highly pathogenic avian influenza. Consequently, Implementing Decision (EU) 2017/247 now provides for the establishment at Union level of further restricted zones in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied therein. Implementing Decision (EU) 2017/247 now also lays down rules for the dispatch of live poultry, day-old chicks and hatching eggs from the further restricted zones to other Member States, subject to certain conditions.*
- (5) *In addition, the Annex to Implementing Decision (EU) 2017/247 has been amended numerous times, mainly to take account of changes in the boundaries of the protection and surveillance zones established by the concerned Member States in accordance with Directive 2005/94/EC.*

- (6) *The Annex to Implementing Decision (EU) 2017/247 was last amended by Commission Implementing Decision (EU) 2018/418, following the notification by Italy of new outbreaks of highly pathogenic avian influenza of subtype H5N8 in the region of Lombardia in that Member State, and the notification by the Netherlands of a new outbreak of highly pathogenic avian influenza of subtype H5N6 in the province of Overijssel of that Member State. Italy and the Netherlands also notified the Commission that they had duly taken the necessary measures required in accordance with Directive 2005/94/EC following those outbreaks, including the establishment of protection and surveillance zones around the infected poultry holdings.*
- (7) *Since the date of the last amendment made to Implementing Decision (EU) 2017/247 by Implementing Decision (EU) 2018/418, Germany has notified the Commission of a new outbreak of highly pathogenic avian influenza of subtype H5N6 in a poultry holding, in Nordfriesland in the Land of Schleswig-Holstein of that Member State.*
- (8) *Germany has also notified the Commission that it has taken the necessary measures required in accordance with Directive 2005/94/EC following that recent outbreak, including the establishment of protection and surveillance zones around the infected poultry holding in that Member State.*
- (9) *The Commission has examined those measures in collaboration with Germany, and the Commission is satisfied that the boundaries of the protection and surveillance zones, established by the competent authority of Germany, are at a sufficient distance to the poultry holding where the new outbreak was confirmed.*
- (10) *In order to prevent any unnecessary disturbance to trade within the Union, and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly describe at Union level, in collaboration with Germany, the protection and surveillance zones established in Germany, in accordance with Directive 2005/94/EC, following the recent outbreak of highly pathogenic avian influenza in that Member State.*
- (11) *Implementing Decision (EU) 2017/247 should therefore be updated to take account of the up-to-date epidemiological situation in Germany, as regards highly pathogenic avian influenza. In particular, the newly established protection and surveillance zones in Germany, now subject to restrictions in accordance with Directive 2005/94/EC, should be listed in the Annex to Implementing Decision (EU) 2017/247.*
- (12) *The Annex to Implementing Decision (EU) 2017/247 should therefore be amended to update regionalisation at Union level in order to include the protection and surveillance zones established in Germany, in accordance with Directive 2005/94/EC, following the recent outbreak of highly pathogenic avian influenza in that Member State, and the duration of the restrictions applicable therein.*
- (13) *Implementing Decision (EU) 2017/247 should therefore be amended accordingly.*
- (14) *The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,*

HAS ADOPTED THIS DECISION:

Article 1

This Decision establishes at Union level the protection and surveillance zones to be established by the Member States listed in the Annex to this Decision, following an outbreak or outbreaks of highly pathogenic avian influenza in poultry or captive birds in accordance with Article 16(1) of Directive 2005/94/EC and the duration of the measures to be applied in accordance with Article 29(1) and Article 31 of Directive 2005/94/EC ('the concerned Member States').

This Decision also establishes at Union level the further restricted zones to be established in the concerned Member States, as referred to in Article 16(4) of Directive 2005/94/EC, following an outbreak or outbreaks of highly pathogenic avian influenza, and the duration of the measures to be applied in those further restricted zones.

This Decision lays down rules concerning the dispatch of consignments of live poultry, day-old chicks and hatching eggs from the concerned Member States.

Article 2

The concerned Member States shall ensure that:

- (a) the protection zones established by their competent authorities, in accordance with Article 16(1)(a) of Directive 2005/94/EC, comprise at least the areas listed as protection zones in Part A of the Annex to this Decision;
- (b) the measures to be applied in the protection zones, as provided for in Article 29(1) of Directive 2005/94/EC, are maintained until at least the dates for the protection zones set out in Part A of the Annex to this Decision.

Article 3

The concerned Member States shall ensure that:

- (a) the surveillance zones established by their competent authorities in accordance with Article 16(1)(b) of Directive 2005/94/EC, comprise at least the areas listed as surveillance zones in Part B of the Annex to this Decision;
- (b) the measures to be applied in the surveillance zones, as provided for in Article 31 of Directive 2005/94/EC, are maintained until at least the dates for the surveillance zones set out in Part B of the Annex to this Decision.

Article 3a

1. The concerned Member States shall prohibit the dispatch of consignments of day-old chicks from the areas listed as protection and surveillance zones in the Annex to other Member States, except where the competent authority of the concerned Member State of dispatch authorises the direct transport of consignments of day-old chicks subject to compliance with the following conditions:

- (a) the day-old chicks must be hatched from hatching eggs originating from poultry kept on establishments approved in accordance with point (a)(i) of Article 6 of Council Directive 2009/158/EC (*) (approved establishments) located outside the areas listed as protection and surveillance zones in Parts A and B in the Annex to this Decision;
- (b) the approved establishment of dispatch (the hatchery of dispatch) can ensure by its logistics and working conditions that no contact has occurred between the day-old chicks and hatching eggs referred to in point (a) and any other hatching eggs and day-old chicks originating from poultry kept in approved establishments located in areas listed as protection and surveillance zones in the Annex;
- (c) the hatchery of dispatch must be located outside the areas listed as protection zones in Part A in the Annex, but it may be located inside the areas listed as surveillance zones in Part B in the Annex.

2. The concerned Member States shall prohibit the dispatch of consignments of day-old chicks originating from hatching eggs from poultry kept in approved establishments located in the protection and surveillance zones listed in the Annex, except where the competent authority of the concerned Member State of dispatch authorises the direct transport of hatching eggs from poultry kept in approved establishments located outside the protection zones, but inside the surveillance zones, to a designated hatchery located outside the protection and surveillance zones, and the competent authority ensures that the day-old chicks originating from such hatching eggs, when dispatched to other Member States comply with the following conditions:

- (a) the day-old chicks have hatched in a designated hatchery located outside the protection and surveillance zones listed in the Annex;
- (b) the day-old chicks originate from hatching eggs that were disinfected and their packaging was disinfected before being transported to the hatchery of dispatch and where the tracing of these hatching eggs can be ensured.

Article 3b

The concerned Member States shall ensure that:

- (a) the further restricted zones established by their competent authorities, as referred to in Article 16(4) of Directive 2005/94/EC, comprise at least the areas listed as further restricted zones in Part C of the Annex to this Decision;
- (b) the measures to be applied in the further restricted zones, as referred to in Article 32 of Directive 2005/94/EC, are maintained until at least the dates for the further restricted zones set out in Part C of the Annex to this Decision.

Article 3c

1. The concerned Member States shall prohibit the dispatch of consignments of live poultry, day-old chicks and hatching eggs from the areas listed as further restricted zones in Part C of the Annex to other Member States, except where the competent authority of the concerned Member State of dispatch authorises, subject to the following conditions, the direct transport of consignments of the following commodities:

- (a) day-old chicks that comply with the conditions laid down in of Article 3a(1)(a) and (b);
- (b) hatching eggs that comply with the following conditions:
 - (i) they originate from poultry kept on approved establishments located outside the areas listed as protection and surveillance zones in Parts A and B of the Annex;
 - (ii) where a clinical visit of the poultry in all the production units of the approved establishments during the 72 hours preceding the dispatch of the consignment has given a favourable result;
 - (iii) the hatching eggs, as well as their packaging, have been disinfected before dispatch in accordance with the instructions of the official veterinarian.

2. The transport of the consignments of day-old chicks and hatching eggs referred to in paragraph (1) shall be carried out without undue delay in vehicles, containers, boxes, as appropriate, that have been cleaned and disinfected according to the instructions of the official veterinarian.

Article 3d

The concerned Member State shall ensure that the veterinary certificates provided for Article 20 of Directive 2009/158/EC, and set out in Annex IV thereto, accompanying the consignments of day-old chicks and hatching eggs referred to in Articles 3a and 3c of this Decision to be dispatched to other Member States include the following sentence:

“The consignment complies with the animal health conditions laid down in Commission Implementing Decision (EU) 2017/247.”.

Article 4

Implementing Decision (EU) 2016/2122 is repealed.

Article 5

This Decision shall apply until 31 Decmeber 2018.

Article 6

This Decision is addressed to the Member States.

Done at Brussels, 9 February 2017.

ANNEX

PART A

Protection zones in the concerned Member States as referred to in Articles 1 and 2:

Member State: Belgium	
Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC
Een 3 km zone rond de haard in Oostkamp (N51.115900-E3.191884). De zone omvat straat(secties) in de gemeenten Zedelgem en Oostkamp.	7.7.2017
Een 3 km zone rond de haard in Menen (N50.799130-E3.213860). De zone omvat straat(secties) in de gemeenten Menen, Wevelgem en Kortrijk.	8.7.2017
Member State: Bulgaria	
Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC
Dobrich region, General Toshevo Municipality	
— General Toshevo	30.3.2018
Member State: the Czech Republic	
Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC
716642 Brť, 602639 Kladruby u Beranova — jihovýchodní hranici území tvoří silnice č. 198, 669946 Kosmová — jihovýchodní hranici území tvoří silnice č. 198, 716669 Otročín, 716677 Poseč, 732796 Prachometry — jihovýchodní hranici území tvoří silnice č. 198, 775681 Sedlo u Toužimi	13.4.2017
Member State: Germany	
Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC
— Land Schleswig-Holstein Insel Süderooge	12.4.2018
Member State: Greece	
Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC
In the regional unit of Kozani, in the municipality of Kozani, the local communities of Akrini, Agios Dimitrios and Ryaki	13.4.2017
Member State: Spain	
Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC

Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC
In the province of Girona the municipalities of — Saus Camallera Llampaias — Colomers — Fontanilles — Garrigoles — Gualta — Jafre — Parlavà — Serra De Darò — Ullà — Ullestret — Vilopriu — Sant Aniol De Finestres — Bescanó — Salt — Sant Gregori — Sant Jordi Desvalls — Sant Marti de Llémèna — Viladesens — Amer — Anglès — La Cellera De Ter — Osor — Sant Julia Del Llor I Bonmati — Llanars — Vilallonga De Ter	23.3.2017
In the province of Barcelona the municipalities of — Canovelles — L'ametlla Del Vallès — Lliça D'amunt — Santa Eulàlia De Ronçana	23.3.2017

Member State: France

Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC
Les communes suivantes dans le département du Nord: — BOUSIGNIES — BRILLON — ROSULT — SARS-ET-ROSIERES — TILLOY-LEZ-MARCHIENNES	21.7.2017

Member State: Croatia

Area comprising:	Date until applicable in accordance with Article 29(1) of Directive 2005/94/EC

Dijelovi naselja Špičkovina, Dubrava Zabočka i Grdenci u gradu Zaboku, naselja Bedekovčina, Križanče i Židovnjak u općini Bedekovčina, naselja Lepa Ves, Hruševac i Vučak u gradu Donja Stubica i naselja Kotarice u općini Sveti Križ Začretje koji se nalaze na području u obliku kruga radijusa tri kilometra sa središtem na GPS koordinatama N 46,033855, E — 15,96607333	4.4.2017
